Portfolio Site

Full-Stack Software Engineer with **3 years** of experience architecting and shipping scalable SaaS and real-time platforms on the **MERN stack**. Proven track record building **IoT device dashboards** (MQTT/WebSockets), **satellite data processing pipelines**, and **secure RBAC-driven multi-tenant systems**. Strong command of **REST API design**, **state management** (Redux Toolkit, RTK Query), **JWT-based authentication**, and **cloud deployment on AWS**.

Technical Skills and Expertise

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, Redux Toolkit, RTK Query, Tailwind CSS, Material UI, Chakra UI
Backend: Node.js, Express.js, REST API Development, Mongoose, Prisma
Databases: MongoDB, PostgreSQL, SQL
Real-Time Systems: MQTT, WebSockets
Cloud & Dev Tools: AWS, Git, GitHub, GitLab, Figma, Visual Studio Code

Professional Experience

•Suhora Technologies - (Space analytics simplified) *Software Engineer | Apr 2025 - Present*

- Built a **real-time AIS vessel monitoring platform** using **Leaflet and deck.gl**, rendering thousands of vessels as **GPU-accelerated polygon layers** (`SolidPolygonLayer`) with live position, heading, and course-based orientation updates.
- Integrated a **ship-detection ML model** into the satellite image-ordering pipeline, automatically detecting and highlighting vessels on ordered imagery to enable downstream geospatial analysis.
- Designed and built an **EPA (Enemy Probable Area) analysis tool**, computing probable vessel search zones in real time on the frontend from configurable parameters (time window, min/max speed, course) and rendering them as live, moving probability areas on the map.
- Developed a **ship playback system** enabling users to drop an **Area of Interest (AOI)** on the map, select a date/time range, and play back the historical route of vessels detected within that AOI, with play/pause controls for detailed track analysis.
- Integrated **open-source multi-OEM satellite metadata** to visualize satellite ground tracks and imagery coverage footprints on an interactive globe, improving accuracy and confidence in image-ordering decisions.
- Implemented secure **RBAC with JWT** and **multi-session authentication** (auto-logout, concurrent-session control), strengthening platform security across the multi-tenant SaaS.

•Galler India - (LMD Hitech India Pvt Limited) *Software Development Engineer | Jan 2025 - Apr 2025*

- Built an **IoT device onboarding system** with API integration and real-time data streaming via MQTT/WebSockets.
- Developed a **multi-tenant SaaS platform** enabling organizations to manage devices, users, and analytics dashboards.
- Implemented **RBAC and ownership transfer** mechanisms for secure access control and device management.

•OneVarsity EdTech Private Limited *Full Stack Engineer | Dec 2023 - Jan 2025*

- Developed a robust EdTech web platform with a streamlined **guest faculty hiring workflow** and end-to-end payment flow via **Razorpay**, increasing faculty onboarding by **70%**.
- Implemented **end-to-end encryption** for request and response bodies, securing sensitive data from console inspection and unauthorized access.
- Integrated **third-party EdTech platforms** for assessments and course delivery, onboarding **10,000 students** and improving academic outcomes and platform adoption.
- Implemented **user lifecycle management** for academic and professional profiles, centralizing workflows for students and faculty to enhance engagement and career opportunities.
- Managed and organized all files in the cloud using **AWS S3 buckets**, enabling efficient storage, retrieval, and secure access of platform data.

Key Projects

•Tokari — Cloud File Storage System *Project Link*
React, TypeScript, Appwrite, Tailwind CSS Live Link

- Built a cloud-based file storage platform, similar to Google Drive, with secure **OTP-based email authentication** and **scalable REST APIs** for file management.

•Anjaan Baba Store — E-commerce Web App *Project Link*
React.js, Context API, React Router v6, CSS Modules, Mockbee (mock backend) Live Link

- Built a scalable product listing page with sorting/filtering and a complete cart-to-checkout flow, integrating the Razorpay payment gateway.

EDUCATION

•B.Sc Computer Science *2019-22*
Shyam Lal College (University of Delhi), Sahadara, East Delhi CGPA: 8.27

•Intermediate (Class 12th) *2016-18*
Naga Ji Saraswati Vidya Mandir Maldepur, Ballia, Uttar Pradesh Percentage: 75%
